## **NATIONAL K–8 SCIENCE EDUCATION STRATEGIC PLANNING INSTITUTE**

Meeting the Challenge of Science Education  
in a High-Stakes Environment

Sponsored by  
**the National Science Resources Center**  
of the National Academies  
and the Smithsonian Institution

Sunday, July 15–Friday, July 20, 2007  
Arlington, Virginia

An effective science education program is the bridge to science literacy for all students. Research-based science learning and teaching promote students' active involvement in their learning experiences, help them develop and retain scientific concepts and skills, hone their critical thinking and reasoning abilities, and prepare them to be members of the future workforce.

- What:** An intensive 5½-day working institute to guide your school districts through the rigorous process of developing a tailored strategic plan—a plan for initiating and implementing an effective research-based science education program founded in best practices.
- Where:** Arlington, Virginia
- When:** Sunday, July 15–Friday, July 20, 2007
- Who:** A five-person leadership team of teachers, school administrators, and a community leader.
- Program:** The institute program will focus on critical questions that school districts must address as they plan for and implement science education reform programs.
- Questions?** For more information, contact Mary Raucci at 202-633-2971 or [laser@si.edu](mailto:laser@si.edu)
